

Module 1+2

It is important to create both business continuity plans and disaster recovery plans

Business continuity will involve assessing, identifying and setting up a team to handle operational issues during an interruption or incident

Protecting assets is the primary goal of a Security team.

escalate	Do not escalate
• malware • unauthorised access	• improper usage

Escalation policies exist to outline how incidents should be escalated.

Module 3 + 4 + 5

Stakeholders have an interest in the operations, decisions and actions taken in a organisation

Risk managers identify risks, inform PR and Legal
CEO are responsible for financial decisions
CFO manage finance and are involved in risk costs
CISO develops security architecture
Operations managers oversee security professionals

- ISO online is a good resource online for cybersecurity news
- Krebs online
- Dark reading

Consider following CISOs, going to BSides events and joining cyber associations.
