

Module 1

This module is the basics of python

I do not need to make notes on this topic

Module 2

Readability

Style Guides outline the writing, formatting of documents.

PEP 8 is the Python syntax guidelines

Module 3

Strings

.index returns the first occurrence of the specified string

Strings are immutable

lists

lists can be concatenated using the "+" operator

.insert adds a element at a specific location

.remove removes the first instance

Regex

Pattern searching strings, re module python
re.findall(pattern, string)

+ - one or more
lw - alphanumeric or _ . - any char
ld - digit
ls - whitespace
lw+@lw+\lw+

Counter example: 1@2.3

Module 6

DevSecOps is building security directly into all of our software release steps

For example:

- SAST - Static application security testing
- DAST - Dynamic application security testing
- SCA - software composition analysis

Files

with - handles resources and errors automatically
